

Saurabh Maurya

+91 7355069174 | saurabh.maurya.dev@gmail.com | LinkedIn | GitHub | Portfolio

Education

Indian Institute of Technology (IIT BHU), Varanasi
B.Tech. in Electronics and Communication Engineering

CGPA – 8.35/10
2020 – 2024

Experience

Associate Member of Technical Staff | Salesforce

June 2024 – Present

• Metadata Revamp & Cache Optimization

- * Led a **metadata dependency extraction framework** that automated inter-component dependency resolution, reducing deployment times by **90%** and improving deployment reliability.
- * Optimized Integration Procedure caching by migrating from **Scale Cache** to **Vega Cache**, reducing cache footprint by **50-70%** and improving cache scalability and memory efficiency.

• OmniStudio Offline Mobile Runtime

- * Architected an offline-first runtime for Salesforce Field Service Mobile, enabling **100% offline execution of OmniScripts** with resilient local state management and synchronization.
- * Designed a metadata-driven rendering engine leveraging **GraphQL** and **SQLite-based local storage**, achieving **<2s startup latency** and **<100ms navigation response times**.

• LLM-Powered Developer Agent

- * Built an **LLM-powered Developer Agent** using **MCP-based orchestration** to automate bug triage and PR generation, reducing engineering investigation effort by **60%+** across large-scale enterprise codebases.
- * Designed a **RAG-powered reasoning platform** integrating source code, logs, work items, and historical PRs to provide context-grounded debugging and accelerate root-cause analysis.

• Tech Stack: Java, Spring, GraphQL, JavaScript, SQLite, Mobile Runtime Architecture, Bazel, Splunk

Software Development Intern | Razorpay Software Pvt. Ltd.

May 2023 – July 2023

- Improved payment-system observability by building **20+ Grafana dashboards** and **integrating 6+ Prometheus metrics** across **3 payment methods**, enabling faster issue detection and diagnosis.
- Built automated Alertmanager-Slack alerting workflows that reduced incident detection and troubleshooting time to **under 10 minutes**.
- **Tech Stack:** Prometheus, Grafana, Alertmanager, PromQL, YAML, REST APIs, Monitoring & Alerting Systems

Projects

Ecommerce Search & Recommendation Engine

GitHub | Live

- Built a scalable search and recommendation platform with asynchronous model retraining pipelines, personalized ranking, and experimentation through **A/B testing**.
- Built a scalable search infrastructure leveraging **PostgreSQL** full-text indexing (**tsvector**), **Redis** caching, and connection pooling, reducing query latency by **40%** across **10K+** user interactions.
- **Tech Stack:** Flask, React, PostgreSQL, Redis, LightGBM, scikit-learn, RQ, SQLAlchemy, pandas, NumPy

YAML Data Visualizer

GitHub | Live

- Built real-time collaboration with **Socket.IO** and delta-based versioning; integrated **GitHub webhooks** with **HMAC-SHA256** verification for auto-synced YAML diagrams.
- Engineered adaptive **D3.js** visualization for **5,000+ nodes** using virtual rendering and **RAF-based frame splitting**, sustaining **60fps** performance.
- **Tech Stack:** React, D3.js, Node.js, Express.js, MongoDB, Socket.IO, OpenAI API, GitHub Webhooks

Achievements

- **LeetCode Knight** (Peak 1931), **Codeforces Specialist** (Peak 1586), **CodeChef 4-Star** (Peak 1863).
- Ranked **862** globally in Google Kick Start 2022 Round G among 108,033 participants.

Skills

Languages: Java, Python, C++, JavaScript, TypeScript

Backend Technologies: Spring Boot, GraphQL, REST APIs, SQLAlchemy

Distributed Systems: System Design, Caching, Event-Driven Architecture, Scalability

Databases & Storage: PostgreSQL, MongoDB, Redis, SQLite

Cloud & DevOps: AWS (EC2, S3, RDS), Docker, Git, Bazel

AI & Agent Systems: MCP, RAG, LangChain, LangGraph, Vector Databases
