EDUCATION

Indian Institute of Technology (IIT BHU), Varanasi

B.Tech. in Electronics and Communication Engineering

CGPA – 8.35/10

2020 – 2024

EXPERIENCE

Associate Member of Technical Staff | Salesforce

June 2024 – Present

- Engineered a dependency extraction system for OmniStudio metadata in Salesforce's Metadata Revamp, automating complex inter-component resolution and reducing deployment time by **90%**.
- Redesigned OmniStudio caching architecture by migrating to Setup Entity-based Vega cache, achieving **50–70% reduction** in cache size and improving memory efficiency without impacting runtime performance.
- Developed a list view for live cards (file-based and record-based) with integrated quick actions and a versions page, enabling scalable and efficient UI interactions.
- Tech Stack:** Java, JavaScript, Apex, GraphQL, LWC, UTAM, Git

Software Development Intern | Razorpay Software Pvt. Ltd.

May 2023 – July 2023

- Designed and deployed **20+ Grafana dashboards** to monitor high-volume payment transactions across **3 payment methods** for Malaysian merchants, improving observability and reducing incident diagnosis time.
- Implemented dynamic alerting pipelines using Alertmanager with **Slack integrations**, reducing incident detection time to **under 10 minutes**.
- Extended Prometheus monitoring by integrating **6+ custom metrics** via optimized API middleware, enhancing real-time system visibility and reliability.
- Tech Stack:** Prometheus, Grafana, Alertmanager, PromQL, YAML, REST APIs, Monitoring & Alerting Systems

PROJECTS

YAML Data Visualizer

GitHub | Live

- Built real-time collaboration with **Socket.IO** and delta-based versioning; integrated **GitHub webhooks** with **HMAC-SHA256** verification for auto-synced YAML diagrams.
- Engineered adaptive **D3.js** visualization for **5,000+ nodes** using virtual rendering and **RAF-based frame splitting**, sustaining **60fps** performance.

Ecommerce Search & Recommendation Engine

GitHub | Live

- Built an ML-powered search ranking pipeline using **LightGBM** and **KMeans** user clustering, with **RQ-based** async retraining triggered on 500 search events, serving personalized results via **A/B testing**.
- Optimized search using **PostgreSQL tsvector** full-text search, **Redis** caching with cursor-based pagination, and connection pooling — reducing query latency by **40%** across **10,000+** user events.

Hackathon Management Platform

GitHub | Live

- Architected a full-stack platform with **6-role RBAC** and **OpenAI**-powered automated evaluation, scoring, and feedback across idea, submission, and mentor-assignment workflows.
- Implemented real-time collaboration using **Socket.IO** with **WebRTC**-based live demo stage, AI-driven deadline risk analysis via **node-cron**, and **Trie**-based member search.

ACHIEVEMENTS

- Secured **AIR 2669** in JEE Main and **AIR 4997** in JEE Advanced among **1M+** candidates nationwide.
- Achieved **Specialist** on Codeforces with a peak rating of **1586** (Profile: Srbmaury).
- Achieved **Knight** on LeetCode with a peak rating of **1931** (Profile: Srbmaury).
- Ranked **862** globally in Google Kick Start 2022 Round G among 108,033 participants.

SKILLS

- Languages:** C++, Java, Python, JavaScript
- Core CS:** Data Structures & Algorithms, OOP, Operating Systems, DBMS, System Design, Distributed Systems
- Backend & Systems:** Node.js, Flask, REST APIs, GraphQL, Socket.IO, WebRTC, Caching, Scalability
- ML & Data:** LightGBM, scikit-learn, pandas, NumPy
- Databases, DevOps & Tools:** PostgreSQL, MongoDB, Redis, Docker, Git, Prometheus, Grafana, D3.js
